- **Adult Health Clinic**

The purpose of the Adult Health Clinic is to diagnose and treat patients with sexually transmitted diseases and other communicable diseases. They provide Tuberculosis detection, treatment, education, and follow-up. The Clinic also provides HIV counseling, testing, and confidential partner notification.

- **BreasTest & More**

BreasTEST & More provides breast and cervical cancer screenings and follow-up to low income and uninsured Georgia women 40 to 64 years of age. Some younger women with symptoms of breast cancer may also qualify.

- **Children 1st**

Connects families and their children with medical preventive care or developmental services available through health care providers and other community resources. This program serves as the point of entry to services such as: Children Medical Services, Babies Can't Wait, First Care (High Risk Infant Follow up) and Universal Newborn Hearing and Screening Intervention.

- **Emergency Preparedness**

The West Central Health District (WCHD) Office of EMS and Emergency Preparedness is charged with protecting the health of and minimizing the threat to its citizens against chemical, biological and radiological threats through awareness, planning and training. Collaboration with local, state and federal authorities to stay ahead of forces that threaten the health of our citizens is essential.

- **Environmental Health**

Provides primary prevention through a combination of surveillance, education, enforcement, and assessment programs designed to identify, prevent and abate the environmental conditions that adversely impact human health.

- **General Clinic**

The General Clinic provides immunizations for a wide variety of communicable diseases for all ages. Travel vaccines are not available. The Clinic also provides scoliosis screenings for all junior high students and conducts immunization audits of kindergartens-6th grade and daycare. Hearing, vision and dental screenings are also available for school aged children.

- **Laboratory Services**

The health department can provide general laboratory services as ordered by a physician. Fees vary by test, please call the health department for more information.

- **Teen/ Adolescent Health**

Abstinence counseling, pregnancy testing, physical exam with birth control, STD evaluation, Healthy lifestyle counseling, HIV counseling and testing, and referrals for various health problems.

- **Women's Health**

The Women's health program provides physical exams with pap smears, lab testing, and assessment for contraceptives.

- **Women Infant Children (WIC) Services**

The WIC program provides nutrition education, vouchers for supplemental food and breastmilk substitute (infant formula) to pregnant women, infants and children up to age 5. We strongly support breastfeeding as the primary source of nutrition for infants age 0 - 1 year and have Breastfeeding Peer Counselors who provide support, encouragement and breastfeeding education to pregnant and postpartum women. WIC clients are screened for nutrition risk and must meet income guidelines to qualify for this federally funded program.
